

Save Energy – Save \$\$

Incentives for Energy Efficiency & Renewable Energy Improvements

Homeowners can receive money back for home energy improvements in a number of ways. Many incentives are available for a limited time and depend on location and utility provider. This page provides information as to what entities are providing rebates, tax credits and grants with links to more information.

Things to remember:

- Work must be completed by a licensed contractor for the particular improvement
- Some rebates require pre-registration, check prior to making improvements
- In general, energy incentives can be combined!
- Incentives are subject to change on little notice
- For a detailed summary please contact the CRC
